NOVEMBER 2021 – DECEMBER 2021

Projects

Linux mini shell

Co- created a custom Linux mini shell. Using system calls, emulates the original Linux shell. Programmed in C language.

Recipe recommendation website

Co-created a page that suggest recipes based on ingredients you have at home. Technologies used: React and MongoDB

AirBnB clone

Co-created an AirBnB clone. It's a RESTful web application programmed using Flask and MySQL as back-end
